ABOUT ME

I am passionate about programming and software development. I am looking for an opportunity to demonstrate my skills and to learn new things. I'm self-taught. I enjoy acquiring new knowledge and solving problems with creativity. I strive to improve every day and add value to all activities I am involved in.

EDUCATION

University Degree in Programming

2021 – 2023

Universidad Tecnológica Nacional – FRC

- *The programming degree provided me with the necessary knowledge for the development of fullstack applications. During the course, I learned to develop websites using HTML, CSS, and JavaScript, as well as NodeJS, basic jQuery and advanced Angular. Also, I gained experience programming REST APIs on the backend and native Windows applications with C# and .NET, using Winforms. I also became familiar with design patterns and the creation and management of relational databases with SQL Server, PostgreSQL and MySQL, as well as non-relational databases with MongoDB. In addition, I learned JAVA programming using Swing and Spring Boot for the backend. It also allowed me to become familiar with agile methodologies such as Scrum and QA testing.*

System Engineering

2018 – 2019

Universidad Tecnológica Nacional – FRC

- *Although I did not finish it, I learned many useful things for my work as a programmer, including computer science, algorithms and Python skills.*

Bachelor's in economics and administration

2012 – 2017

Escuela Superior El Nacional

- *Focused in the areas of economics, accounting and business management.*

SKILLS, LANGUAGES AND TECHNOLOGIES

- HTML, CSS and Javascript
- C#
- .NET Core
- SQL Server
- PostgreSQL
- Typescript
- Angular
- Bootstrap
- Tailwind
- Communication skills
- Problem solving
- Analytical thinking
- Self-study
- Adaptability

WORK EXPERIENCE

Electrician Assistant

2019 – 2020

Local Electrician, La Carlota, Córdoba

Accountant Assistant (Internship)

2017

Molinos Marimbo

- Administrative tasks related to accounting; file organization, searching for discrepancies in accounting books.

TECHNICAL EXPERIENCE

Projects

- Coding Ideas Generator (2024). Angular, Tailwind.
 - <https://auguscav.github.io/generador-ideas-code>
- Chess Tournament Manager (2023). C#, .NET Core, SQL Server, Angular.
- Purchasing-Sales Manager for Ice Cream Parlor (2022). Java, SQL Server.
- Blackjack (2022). Web application to play Blackjack against the computer. Angular, Bootstrap.
 - <https://auguscav.github.io/black-jack/>
- Calculator (2021). Javascript, HTML, CSS.
 - <https://auguscav.github.io/calculadora>

ADDITIONAL EXPERIENCE

Formando Emprendedores

2015 – 2017

- Educational business simulation competition that requires knowledge in mathematics, economics, business management, text interpretation, problem solving, communication and teamwork. My team and I reached the National Final two consecutive years, in 2016 and 2017.

LANGUAGES

- Native Spanish
- English level B1
